## Education

---

- **PhD Student**

Basque Center on Cognition, Brain and Language, Spain

09/2025 – Now

Research interest: Speech perception, auditory neuroscience, speech technology

- **MPhil in Linguistics, Philology, and Phonetics**

University of Oxford, Oxford, United Kingdom

10/2021 – 06/2023

Grade: Merit

Dissertation: Structured variability in British English intonation: unraveling the informativity of dialect

- **MPhil in Research in Second Language Education**

University of Cambridge, Cambridge, United Kingdom

10/2020 – 07/2021

Grade: Merit

Dissertation: Notes as staging posts: an activity theory inquiry into the mediating effects of note-taking on writing among FL learners of Arabic in China

- **Bachelor in Arabic Language and Literature**

Sun Yat-sen University (SYSU), Guangzhou, China

08/2013 – 06/2017

Overall GPA: 4.2 (92/100) Major GPA: 4.5 (95/100) Ranking: 02/29

## Research Projects

---

- **[Ongoing] A precision-weighted learning model for speech perception adaptation**

with Dr. Alejandro Tabas

- Reconceptualize speech perception adaptation as a continuous tracking problem
- Implemented a linear Gaussian dynamical model, and compared its performance with existing models

- **[Ongoing] Evaluating the emergence of talker information in deep neural network models**

with Dr. Alejandro Tabas

- Training deep learning models (wav2vec 2.0, Hubert) and examining the role of different objective functions on the emergence of talker information

- **Hierarchical Bayesian model of perception adaptation generalization**

with Dr. Xin Xie

- Implemented a hierarchical version of the ideal adaptor model.
- Developing custom R package functions for simulating human perception responses.

- **Modeling cue re-weighting in Dimension-based Statistical Learning**

with Dr. Xin Xie

- Evaluated existing computational models of cue re-weighting on 6 experiments results
- Used computational models to argue that short-term cue re-weighting cannot be described as belief updating.

## Publications

---

1. **Lu, Y., Liao, X. L., Tabas, A., & Xie, X.** (2026). Modeling generalization in perceptual learning of speech. Proceedings of the Society for Computation in Linguistics (SCiL 2026).
2. **Lu, Y., & Xie, X.** (2024). Modelling cue re-weighting in dimension-based statistical learning. In Proceedings of the Annual Meeting of the Cognitive Science Society (Vol. 46).

## Conference Presentations

---

- **Lu, Y., Liao, X. L., Tabas, A., & Xie, X.** (2026, July). Modeling generalization in perceptual learning of speech [Paper presentation]. Society for Computation in Linguistics (SCiL 2026).
- **Lu, Y.** (2024, October 24-26). Modelling the late frontal positivity: an investigation into the relationship between prediction failure and semantic learning [Sandbox session]. Society of Neurobiology of Language, Brisbane, Australia.
- **Lu, Y., & Xie, X.** (2024, July 24-27). Modeling Cue Re-weighting in Dimension-Based Statistical Learning [Talk]. Cognitive Science Society Annual Conference, Rotterdam, Netherlands.
- **Lu, Y.** (2024, July 8-11). Structured Variability of British English Intonation [Poster presentation]. Highlight in language science, Nijmegen, Netherlands.
- **Lu, Y.** (2024, June 5-7). Perceptual Learning and Tonogenesis: A Behavioral and Computational Study [Poster presentation]. International Max Planck Research School (IMPRS) for Language Sciences

## Awards

---

- *Travel grant*, Society for Computation in Linguistics 07/2026
- *Student travel award*, Cognitive Science Society annual conference 07/2024
- *Outstanding Bachelor dissertation*, Sun Yat-Sen University 06/2017
- *Exchange Scholarship*, Language center, University of Jordan 09/2015–07/2016
- *Exchange Scholarship*, Hebrew University of Jerusalem (Summer Ulpan) 07/2015

## Skills

---

- **Programming:** Python, R, Praat, Bash, LaTeX.
- **Language skills:**
  - **Excellent in:** Standard Arabic (+ Jordanian and Moroccan), English, Mandarin Chinese
